

CULTURE FORMATIONS (II)

PREHISTORIC ART

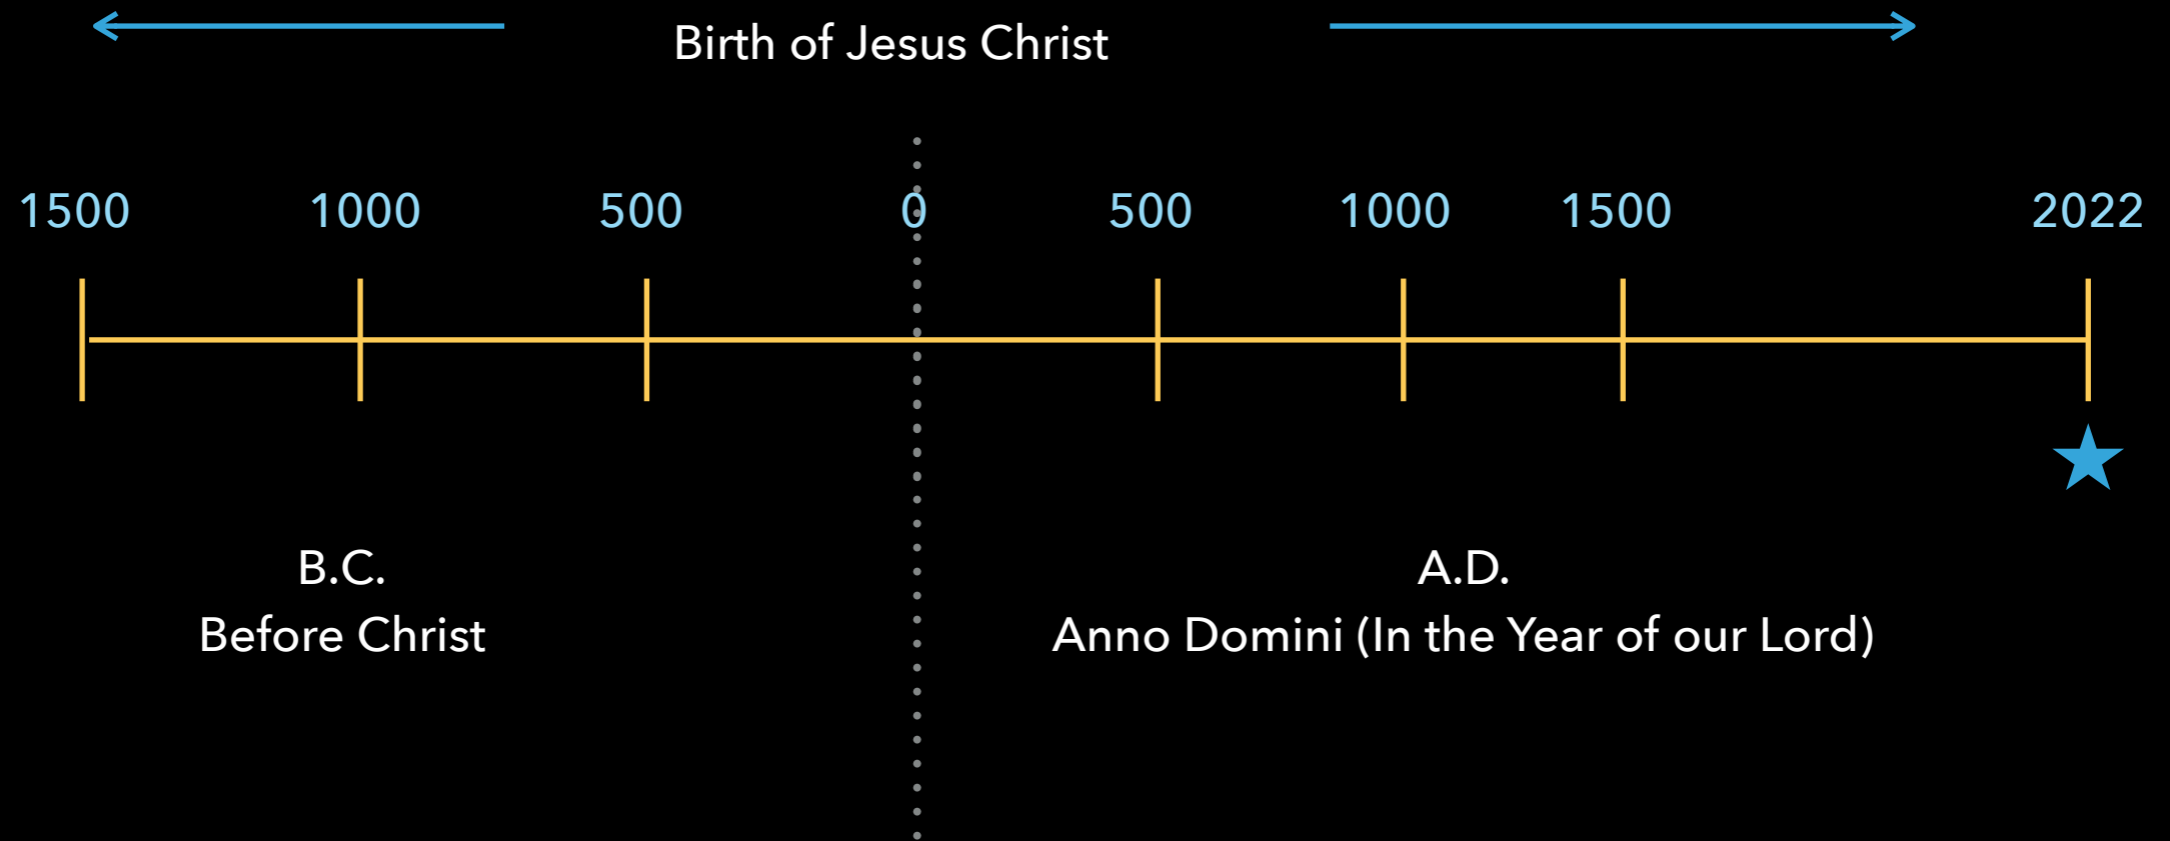

(2.5 MYA - 3000 BCE)

Key Concepts

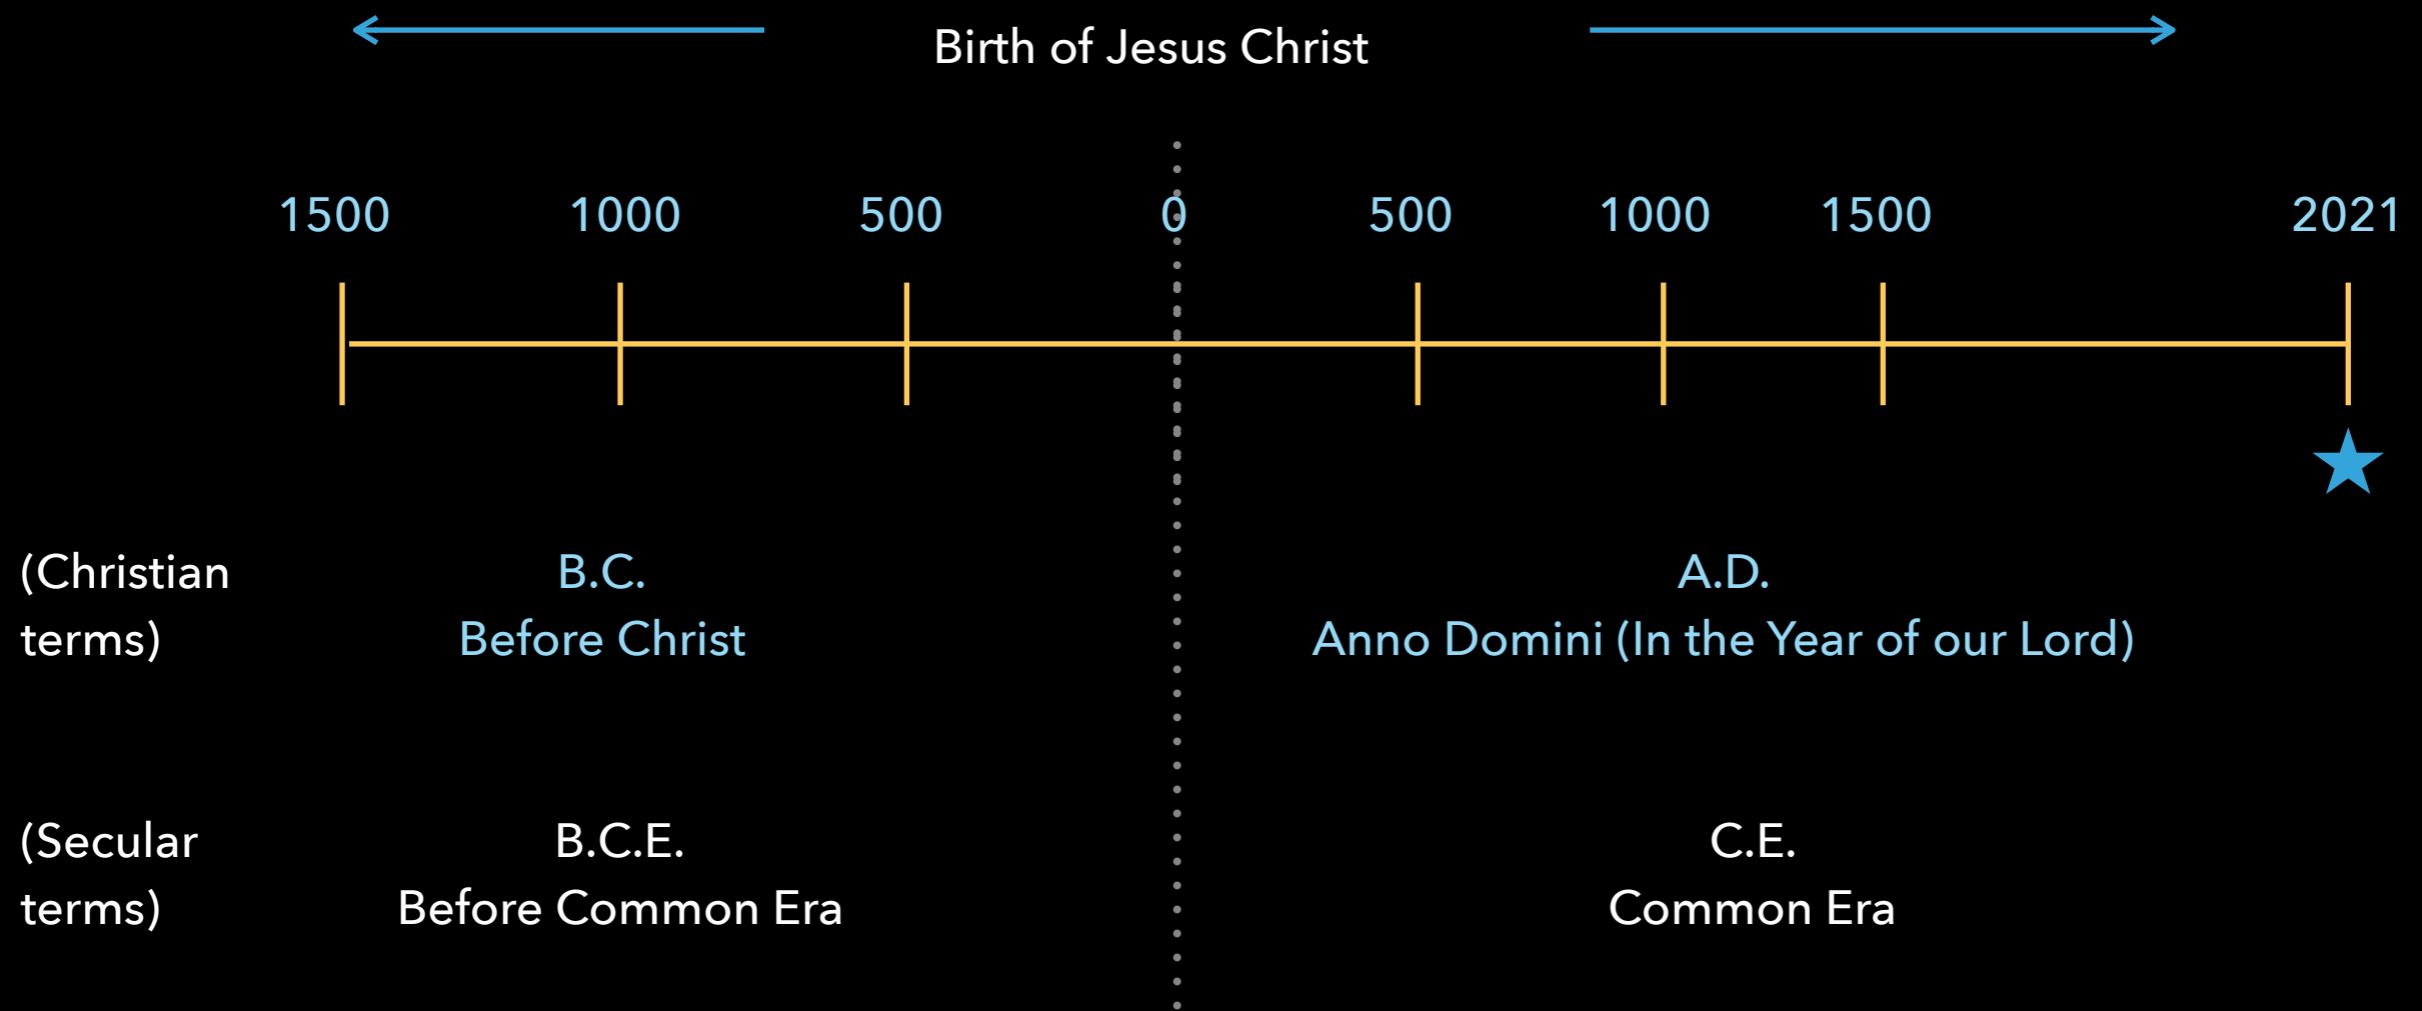

- ▶ What is a work of art?
- ▶ How to “read” an object
- ▶ The development of civilization, culture and society

NOTE ON DATES, TIMELINES, CHRONOLOGIES

NOTE ON DATES, TIMELINES, CHRONOLOGIES

Circa: written as c. or ca.

- Means approximately; used to indicate that the exact date isn't known
- c. 400 BCE would mean approximately 400 years before the Common era

What Constitutes "Art"?

Augustus of Prima Porta,
1st century C.E.
Collection of Vatican
Museums

Jar (Guan)
c. 2350-2050 B.C.E.
China
Collection of the Met Museum

Jacob Lawrence
The Pool Parlor
1942
Collection of the Met Museum

Representational Art versus Abstract Art

Michelangelo,
David
Marble
C. 1501-1504

Jackson Pollock
White Light
1954

Representational Art versus Abstract Art

Magdalenian, Bison licking its back, 15th to 10th millennium BCE

What is Prehistory?

- ▶ A term that refers to all human history **before the invention of writing systems**, c. 3100 BCE. However, human expressions existed long before writing, as we will see in this lecture.
- ▶ Our understanding of this history is more of a **reflection of archaeological discoveries** than a true chronology of when humans created art (several gaps, limitations)
- ▶ Often art history texts begin with prehistoric art in Europe, but prehistoric art has been **found across the world**.
- ▶ It is generally categorised in **three periods**: the Stone Age, the Bronze Age and the Iron Age (for this lecture, we will be focusing on art from the Stone Age)

Drawing depicting The Shell Mound People, from the later Stone Age. They get their name from the distinctive mounds of shells and other kitchen debris they left behind.

TIMELINE OF THE STONE AGE

Paleolithic
(Old Stone Age)

Mesolithic
(Middle Stone Age)

Neolithic
(New Stone Age)

Handaxe,
India

Omo Kibish Point,
Ethiopia

Harpoon Point,
Democratic Republic of Congo

Paleolithic era

Society

- ▶ Humans lived in **caves or simple huts**- were primarily **hunters and gatherers**
- ▶ Used **basic stone and bone tools**
- ▶ Period ended with the last Ice Age, which resulted in the extinction of many large mammals, **climate change** and eventually caused man to **migrate**

Art:

- ▶ Subjects of art were primarily related to **food** (hunting scenes, animal carvings) or **fertility** (figures of women)
- ▶ **Small figurines** carved from stones, clay and bones.
- ▶ **Cave paintings** made using charcoal, minerals and tree saps.

- ▶ One of the oldest surviving works of art
- ▶ Discovered in 1908 in Willendorf, a village in Austria
- ▶ "Venus": associated this figure with the goddess of love and beauty
- ▶ Accentuated breasts (associations of fertility, nursing, motherhood,
- ▶ Little emphasis on correct anatomy
- ▶ No details of face or features (not a portrait of a person)
- ▶ Very small size (could fit in your palm)

Venus of Willendorf
Austria
c. 28000-25000 BCE

Lascaux Cave painting
Southwest France
c. 15000-17000 BCE

Lascaux Cave painting, Southwest France, c. 15000-17000 BCE

Mesolithic era

Society

- ▶ Often lived **nomadically** in camps nears rivers and other water bodies-
- ▶ Used small stone tools, now **polished and sharpened** to serve as arrows

Art:

- ▶ Demand for **personal and decorative** art like jewellery and pottery- but emphasis was still on use not design/aesthetics
- ▶ Shift in subject matter. Early cave paintings focused on animals, but now paintings were usually of **human groups**, showing them hunting or engaged in rituals.
- ▶ Due to the warmer climate, the paintings were now created on **outdoor walls** rather than caves
- ▶ Often the humans are highly stylised and repeated as if in a **pattern**.

Pachmari Hills, Central India, ca. 9000-3000 B.C.

Pachmari Hills
Central India
ca. 9000-3000 B.C.

Neolithic era

Society

- ▶ Switched from hunter/gatherer to **food production**- agriculture was more widely practiced, animals were domesticated, new farming techniques developed
- ▶ Used polished hand axes for ploughing and tilling the land and **started to settle** in the plains

Art

- ▶ Advancements in pottery and art- more **decorative** and for **ornamentation**, not just function
- ▶ Sculpture no longer only made by carving- now detailed **figurines made of clay**, perhaps used for rituals
- ▶ Architecture and **megalithic constructions**- creation of temples for gods and goddesses, tombs for the dead

Vessel with flame-like ornamentation
Middle Jomon period, Japan
3000-2000 BC

Deep Bowl
Middle Jomon Period, Japan
3000-2000 BCE

Stone Henge, England, 3000-2000 BCE

Stone Henge, England, 3000-2000 BCE

GLOSSARY

- ▶ **Nomadic:** A community of people who move from one place to another, rather than settling permanently in one location.
- ▶ **Megalith:** A construction involving one or several roughly hewn stone slabs of great size.
- ▶ **Representational:** includes objects or events in the real world, usually looking easily recognizable.
- ▶ **Abstract:** Imagery that is so far removed from its actual real-world appearance that it is almost impossible to easily discern what is being represented.
